

Ammar Ahmed

Full-Stack Developer

Cottbus, Brandenburg, Germany | hafiz.ammar33@gmail.com | (+49) 15754763065 | LinkedIn | github.com/ammamr081

SUMMARY

Full-Stack Developer with 3+ years of software development experience across professional work, production web applications, and project-based systems. Strong in React, Next.js, TypeScript, Node.js/Express, NestJS, Python/FastAPI, REST APIs, PostgreSQL, MongoDB, secure authentication, real-time communication, background jobs, automated testing, Docker, and GitHub Actions CI/CD. Experienced in end-to-end product delivery and maintainable API-connected architecture.

EXPERIENCE

Software Developer

Uforia Infotech Inc

April 2022 - May 2023, Islamabad, Pakistan

- Built React components and API-connected production workflows in a Scrum team of 8.
- Integrated REST APIs and collaborated with backend engineers on complete customer-facing features.
- Supported requirements, implementation, API testing, debugging, code reviews, and release handover.
- Refactored reusable components and improved validation, loading, error, and success states.

Software Developer

Silicon Centre

March 2021 - March 2022, Lalamusa, Pakistan

- Developed React, Redux, and API-connected management workflows for operational data review.
- Built dashboards and Chart.js visualizations backed by server-connected data.
- Introduced Next.js rendering for selected pages and improved complete feature workflows.
- Translated business requirements into working features and supported iterative releases.

SELECTED PROJECTS

AI Energy Data Analyst | Technologies: Next.js, TypeScript, FastAPI, PostgreSQL, Redis, Celery, WebSockets

- Built a full-stack platform for data ingestion, validation, KPIs, anomaly detection, forecasting, and reports.
- Implemented JWT/RBAC, background report jobs, live telemetry, vector search, Docker, pytest, and CI.
- Connected typed dashboards to secure APIs, PostgreSQL persistence, and real-time processing workflows.

AI Research Assistant | Technologies: Next.js, TypeScript, Node.js APIs, PostgreSQL/pgvector, Docker

- Built PDF ingestion, chunking, embeddings, semantic retrieval, source citations, and saved chats.
- Implemented server-side OpenAI/Gemini provider flows, persistence, validation, and responsive UI states.
- Designed a source-grounded RAG workflow with metadata storage, secure configuration, and Docker support.

EDUCATION

Master's in Artificial Intelligence | Brandenburg University of Technology Cottbus-Senftenberg | Oct. 2023 - Present | Cottbus, Germany

Bachelor's in Computer Science | University of Gujrat | Oct. 2015 - July 2019 | Gujrat, Pakistan

SKILLS

Languages & Frameworks: TypeScript, JavaScript, Python, React, Next.js, Node.js, Express, NestJS, FastAPI, Flask

Frontend: Redux Toolkit, RTK Query, Zustand, React Router, Vite, Tailwind CSS, Material UI, responsive UI

APIs & Real Time: REST, GraphQL, Axios, JSON, SSE, WebSockets, request validation, third-party APIs

Databases: PostgreSQL, MongoDB, Mongoose, SQLite, SQLAlchemy, pgvector, Supabase

Security: JWT, OAuth, RBAC, bcrypt, protected routes, CORS, Helmet, rate limiting, sanitization

Testing & Quality: Jest, React Testing Library, pytest, Ruff, ESLint, API testing, code reviews

DevOps & Delivery: Docker, Docker Compose, GitHub Actions CI/CD, Redis, Celery, Git, Render, Vercel

Languages: English: C1, German: A1, Urdu/Punjabi: Native
