

Ammar Ahmed

Full-Stack Software Engineer | React, Next.js, Node.js | AI-Enabled Web Products

hafiz.ammar33@gmail.com | (+49) 15754763065 | Cottbus, Germany | [LinkedIn](#) | GitHub: github.com/ammam081

PROFILE

Full-stack software engineer with 3+ years of software development experience (freelance and product teams) and recent AI-enabled product work. Experienced across React/Next.js, Node.js/Express, REST APIs, SQL/NoSQL databases, and GenAI integrations. Fluent in English (C1) and effective in English-first engineering teams. Seeking full-time software engineering roles across web, full-stack, or AI-product teams in Germany.

CORE SKILLS

Core Stack: JavaScript/TypeScript, React, Next.js, Node.js, Express, REST APIs, GraphQL, Prisma, SQL, MongoDB, PostgreSQL/Supabase

Frontend: Tailwind CSS, Redux, Zustand, Material UI, Styled Components, responsive UI, SSR/SEO, dashboards, Chart.js

AI-Enabled Products: RAG, embeddings, semantic search, pgvector, OpenAI API, Gemini API, streaming chat, PDF parsing, source-grounded answers

Engineering Tools: Git, GitHub, GitLab, Bitbucket, Jira, Postman, Figma, GitHub Actions, Docker, Vercel, Render, Agile/Scrum

WORK EXPERIENCE

Uforia Infotech Inc | May 2022 - May 2023 | Islamabad, Pakistan

Software Engineer

- Built and maintained reusable React components for production web applications in a Scrum team of 8, shipping end-to-end customer-facing features.
- Integrated REST APIs and partnered with backend engineers and design stakeholders across the full feature lifecycle, from spec to release.
- Implemented TypeScript/Javascript interfaces with Material UI, Tailwind CSS, and Fabric.js.
- Diagnosed issues across browser, API, and application-state boundaries using developer tools and Postman.
- Contributed through Git-based code review, Jira/Scrum collaboration, quality checks, and release handover.

Silicon Centre | March 2021 - April 2022 | Gujrat, Punjab, Pakistan

Software Engineer

- Rebuilt internal management flows with React and Redux, translating business requirements directly into shipped interfaces.
- Integrated frontend views with backend endpoints and validated request/response behavior during feature delivery.
- Introduced SSR with Next.js and refactored repeated UI patterns for maintainability, improving page load performance and organic SEO visibility.
- Developed responsive dashboards, Chart.js visualizations, and GSAP-based interaction polish for day-to-day operational tools.
- Traced issues across browser requests, application state, and backend responses to support reliable releases.

Fiverr (Freelance) | January 2020 - December 2020 | Remote (Punjab, Pakistan)

WordPress Developer

- Delivered and customized responsive WordPress websites for freelance clients, managing requirements and delivery independently.

SELECTED PROJECTS

AI Research Assistant with RAG | Technologies: Next.js, TypeScript, PostgreSQL/pgvector, Gemini/OpenAI APIs, Tailwind CSS

- Engineered a full-stack PDF research workspace: uploads, saved chats, responsive layouts, and per-chat document context.
- Implemented RAG features — chunking, embeddings, semantic search, citation filtering, source-grounded answers.
- Dockerized the pgvector setup and connected frontend workflows to server-side API/AI logic end to end.

AI Chatbot UI | Technologies: React (Vite), Tailwind CSS, Zustand, Node/Express, SSE, Google Gemini, Supabase/Postgres

- Delivered a full-stack streaming chat app (React, Zustand, Tailwind CSS, Node/Express, SSE, Google Gemini).
- Protected API keys via server-side proxying; added stop action, persistence, timeouts, and error states.

Link/Repo: github.com/ammam081/ai-chatbot

AI Energy Data Analyst | Technologies: Python, FastAPI, pandas, scikit-learn, statsmodels, PostgreSQL, Next.js/React, TypeScript, Docker, Celery/Redis

- Designed a full-stack renewable-energy operations platform (Next.js/React, FastAPI, PostgreSQL) with JWT-based role permissions (admin/analyst/viewer) and Celery/Redis background report jobs.
- Implemented data-cleaning, KPI, anomaly-detection, and forecasting services in Python (pandas, scikit-learn, statsmodels), plus a safe LLM-explanation layer that never computes numbers itself.

- Enforced quality with 23 backend (pytest/Ruff) and 17 frontend (Vitest/Playwright/axe-core) tests in GitHub Actions CI; deployed via a one-click Render Blueprint spanning web, API, and database.

EDUCATION

Brandenburg University of Technology Cottbus-Senftenberg | October 2023 - Present | Cottbus, Germany

Master's in Artificial Intelligence

University of Gujrat | October 2015 - July 2019 | Gujrat, Pakistan

Bachelor's in Computer Science

CERTIFICATIONS

Node.js API Masterclass — Brad Traversy (Udemy) | React - The Complete Guide — Academind (Udemy) | JavaScript - The Complete Guide — Academind (Udemy)

LANGUAGE SKILLS

English (C1) — primary working language | German (A1, actively studying) | Urdu/Punjabi (native)
